We have two of our visitation rooms’ set-up to allow for video conferencing. These are the same rooms used when a professional visitor presents themselves at this facility for contact with a client.

To use one of these rooms for video conferencing with your client you will need to schedule your visit at least 12 hours in advance.

To be able to use this system you must have access to a PolyCom Video Conference System or a laptop/desk top with the PolyCom Software loaded onto it and a web cam. You must provide the scheduler with your IP address. When the scheduled time comes for your visit we will call you on the PolyCom.
